WHAT WE'RE SELLING

A fully operational, ready-to-run elderly homeowner contract brokerage — complete with AI platform, lead pipeline, B2B partner & fund contact lists, campaign scripts, and full business documentation. Investor acquires **80% ownership**. We retain **20% net** and manage all technical and commercial operations.

THE BUSINESS MODEL

AloAlo is an AI-powered deal origination engine for Leibrente (Germany), Viager (France), and Vendita con Riserva (Italy) contracts. We generate opted-in elderly homeowner leads through digital advertising, qualify them with AI voice agents running 24/7, then send field partners to the home to sign the contract with a notary. That signed contract is sold to an investment fund at a **15–20% origination fee on top of the contract price**. The same home visit offers a care services subscription, generating a second recurring revenue stream via referral commission.

01	Ad Published	Google / Facebook / Social → elderly homeowner sees ad
02	Form Fill + Consent	Homeowner fills form → GDPR-clean consent → enters pipeline
03	AI Qualifies 24/7	AI voice agent calls, qualifies interest, books home visit appointment
04	Home Visit	Field partner visits — explains contract, builds trust
05	Notary Signs	Leibrente / Viager signed → legal ownership transfers to us
06	Sold to Fund	Contract sold → fund pays contract price + 15–20% origination fee
07	Care Upsell	Same visit → care subscription offered → recurring referral commission

Leibrente / Viager / Vendita con Riserva	Established legal contract in each respective market

AloAlo is not a concept — it is a built, tested, ready-to-run revenue engine. The platform is live. The scripts are written. The contact lists are compiled. The fund relationships are in motion. We are looking for one serious operator to deploy capital into the field and scale what we've built across three countries.
